

Wireless Advanced Communications Inc.

3901 West Service Road, Evans, Colorado 80620

HISTORY

In 1995, Wireless Advanced Communications Inc originated in Greeley, Colorado by purchasing the local Motorola Service Station from Motorola Inc. The company began with seven employees and has expanded all facets of their services that currently include design and implementation of public safety and private commercial communication systems. In addition, WAC's Public Safety Division outfits over fifteen hundred new and services in excess of five thousand vehicles annually. Over the past 20 years, the company has become a full line distributor of Motorola's professional series radios, a Manufacturer's Representative for Public Safety agencies and a Motorola Premier Service Partner & Platinum Channel Partner in Colorado and Wyoming. The company currently employs over ninety employees located at our three facilities in Evans, Colorado and one in Albuquerque, New Mexico.

MAJOR PROJECTS THAT INCLUDE INSTALLATION AND MAINTENANCE SERVICES:

- State of Colorado Statewide Digital Trunked Radio System, (DTRS) (2014 System upgrade from system release 6.5 to 7.14, 213 sites, 5-zone controllers, 280-IP based dispatch consoles, 1000+ user agencies)
- State of Wyoming Statewide Digital Trunked Radio System (2014 System upgrade from system release 7.11 to 7.14, 72 sites, 2-zone controllers, 102-dispatch consoles at 28 centers, 112-State and Federal agencies in 19-Counties)
- Front Range Communications Consortium, (FRCC) Weld/Adams Counties (2014 new deployment of a 15-site, K Core P25 trunked system that includes 2-simulcast cells and 4-MCC 7500 dispatch Centers)
- State of Michigan Statewide Digital Trunked Radio System, (MPSCS) (2012 part of a 800 MHz rebanding effort, 62,000 subscribers, 1,432 agencies)
- MCC 7500 Dispatch Console Installation, (WAC is the primary sub-contractor certified by Motorola Solutions to perform IP based dispatch installations in Colorado and Wyoming)
